

CORNERSTONE OFFICE ADDITION

Years of rapid growth prompted **Cornerstone Church** to explore expansion and **repurposing** existing spaces. JCorp worked with the client to develop a plan to repurpose existing office space into classrooms to expand children's programs and design a new office expansion to accommodate a growing staff. Organized by "pods" for each staff team, the office spaces foster a collaborative team dynamic for each ministry. We thoughtfully addressed the existing building and created a cohesive whole throughout the design and construction process.
